

How to support the adjustment and long-term employment of detainees?

WORKSITE COMMUNICATION

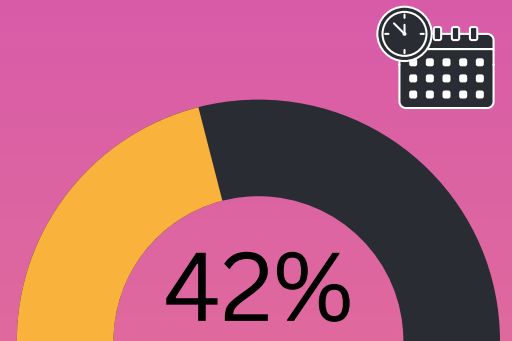

Overview

Pre-release detainees need to be prepared for achieving stable and satisfactory employment.

European detainee population is young (median age 36 years) 42% will be released in between 1 to 5 years.

Prison education could help by increasing interpersonal communication skills (ICS), introducing positive civic values, and providing the necessary tools to solve social challenges.

WORKSITE COMMUNICATION -RECOMMIT-

Project aims to identify work-related communication challenges to pre-release detainees, guiding the development of a high quality training curriculum, inclusive of a custom-made VR platform, to be delivered in prison settings.

1 INTERPERSONAL COMMUNICATION SKILLS CURRICULUM

2 VR PLATFORM

3 TRAIN THE TRAINER
