## Last Transnational Partner Meeting in Barcelona

On November 5–6, 2024, the RECOMMIT Project celebrated its final transnational partner meeting, hosted by Andromines, marking a pivotal moment in the project's journey.

The first day of the meeting featured in-depth presentations and discussions on the project's achievements, lessons learned, and the impact of innovative approaches like blended and VR-based learning on social reintegration strategies. Partners also collaborated on plans for ensuring the sustainable implementation of project outcomes and their long-term impact.

The second day included a visit to the Puig de les Basses Penitentiary Centre in Figueres, offering partners a firsthand look at the prison's modern facilities and comprehensive educational and rehabilitative programs. Observing the center's emphasis on education, personal growth, and skill-building underscored the importance of supportive environments for successful reintegration.

The meeting was a resounding success, concluding with gratitude to Andromines for their exceptional hospitality. As the RECOMMIT Project approaches its conclusion, partners invite the public to stay engaged and follow updates on the project's social media.

For more information about the project, follow us on **social media Recommit-worksite communication project** (<https://www.facebook.com/recommiteu>) or contact your local partner.
